

To the students fighting privatisation at Sao Paulo University,

Dear comrades,

We understand that you are currently engaged in a major battle to prevent Sao Paulo University from being privatised. We salute your magnificent stand in organising against this pro-market legislation proposed by José Serra, the Governor of the State of Sao Paulo.

As a grouping of university and college workers we are ourselves engaged in battles to stop the encroachment of the market in the education field, and our organisation, UCU Left, was explicitly founded to defend educational equality, and to oppose the consequences of neo-liberal marketisation. As such, we offer you our full support in your fight and send you our fraternal best wishes.

Mark Campbell
